

Giovanni Capone North Royalton District

Giovanni Capone is a senior at North Royalton High School and is enrolled in CVCC's Programming Software Development (PSD) program instructed by Ms. Little. His favorite part of the program has been the java programming element. So far, Giovanni feels the course work within the PSD program has come very naturally for him. Giovanni enjoys the structure of CVCC and the independence it provides students. Giovanni is employed part-time by CVCC's Information Technology department, where he assists with day-to-day tasks the department handles.

In his free time, Giovanni enjoys listening to and making music; he plays the piano and guitar, as well as writes songs. Giovanni plans to go to the University of Cincinnati and study computer science. He aspires to become a programmer or video game designer. Best of luck!
