Elliot Parham

Revere District

Elliot Parham is a senior at Revere High School and is enrolled in CVCC's Power Equipment Technology program instructed by Mr. Koenig. Elliot enrolled in this program because he wanted to follow in the footsteps of his father, who works with diesel engines. Elliot enjoys taking apart and rebuilding engines as well as the welding element of the program. Acquiring the focus and attention needed to do well in the program was a bit tough for Elliot at first, however after stepping up, as well as with the help of Mr. Koenig, Elliot has done great this year! Elliot appreciates the great people he has met at CVCC. He is involved in student council and the recycling club at Revere. He was also a CVCC delegate in SkillsUSA, a student leadership organization, during his junior year.

Outside of academics, Elliot works at Dairy Queen, enjoys riding dirt bikes, as well as playing video games and poker. After graduation, Elliot plans on going to University of Northwestern Ohio (UNOH) and studying medium and heavy-duty diesel. He is considering going on to get a business degree as well. His goal is to buy and resell diesel applications. Best of luck Elliot!
