

Logan Luther Revere District

Logan Luther is a junior at Revere High School and is enrolled in CVCC's Power Equipment Technology (PET) program instructed by Mr. Koenig. Various members of Logan's family took this program and encouraged Logan to do the same. Having always been interested in the subject matter, specifically diesel engines and repairs, he knew he'd be a great fit! Logan's favorite part of the program has been breaking down motors, learning which part does what function, and then rebuilding them. There is a lot of information to remember within the PET program, however Logan is up for the challenge! Logan appreciates CVCC for providing a very hands-on environment, and feels fulfilled attending class every day.

Logan works at his family's farm where he assists in repairs, caring for the animals and harvesting crops. In his free time, Logan enjoys riding dirt bikes and reading. Looking ahead, Logan really enjoys working on his family's farm and hopes to do so in the future. He also would like to work with heavy equipment or possibly welding. Keep up the great work Logan!
