Kyelle Woods

Garfield Heights

Kyelle Woods is a junior at Garfield Heights High School and is enrolled in CVCC's Power Equipment Technology (PET) program instructed by Matthew Harding. Since a young age, Kyelle has been fascinated by engines, and knew that working on engines was what he wanted to do for the rest of his life. That said, attending the PET program at CVCC was the easiest "yes" for Kyelle.

"Kyelle is a phenomenal student who shows discipline and is committed to quality. There's no doubt that he will be great in the repair field." -Matthew Harding, PET Instructor

Kyelle really appreciates all of the hands-on learning in the program. His favorite project in class has been working on a V8 engine because it's allowed him to learn more about the intricacies of engines.

"My advice to future students is to really think about your options because there are endless opportunities at CVCC. You could go in blind to a program, not knowing anything about the field, and leave the program being an expert on the basics of the field. CVCC has opened me up to more career opportunities than I could have imagined." -Kyelle Woods

After graduation, Kyelle plans to go into heavy diesel machinery mechanics, and continue to expand his knowledge on engines. Outside of academics, Kyelle works at a garden center and enjoys spending time with his dogs. Keep up the great work, Kyelle!
