CUYAHOGA VALLEY CAREER CENTER

Haley McEwen

Class of 2021

Haley McEwen, a 2021 Revere High School graduate, completed the Electrical Systems program at CVCC under the guidance of Joseph McNamee. Knowing she wanted a hands-on career after high school, Haley was drawn to the program after visiting the classroom and speaking with Mr. McNamee.

Haley appreciated the hands-on learning environment at CVCC, which made it easy for her to dive into the program. She particularly valued the opportunity to work alongside students from various school districts and still keeps in touch with many of her classmates to this day.

She is especially grateful for Mr. McNamee's field experience and how he prepared his students for real-world challenges. The math skills she learned in the program have been critical in her current role, and she's seeing firsthand how her training translates into her job. She is especially thankful for the knowledge she gained in wiring and the use of a wide range of tools.

Currently, Haley is a third-year apprentice with Local 306 Akron, assisting with electrical and pipe work at Akron Children's Hospital as they renovate the floors. Her advice to future and current CVCC students is to pay close attention, make the most of the resources and opportunities available, and apply everything you learn. Haley firmly believes that attending CVCC makes it much easier to secure a job after high school, calling it a privilege and one of the best decisions she's ever made. CVCC is so proud to have you as an alumna, Haley! We wish you all the best in your future endeavors.
