CUYAHOGA VALLEY CAREER CENTER

Alex Nemeth

Cuyahoga Heights

Alex Nemeth, a senior at Cuyahoga Heights High School, is part of CVCC's Power Equipment Technology (PET) program, instructed by Matthew Harding. Although he isn't certain when his interest in heavy machinery began, Alex has always been drawn to a career in this area. After hearing glowing reviews about the PET program, he recognized it as the ideal choice for him. *"If you're serious about a career in this field, you'd be crazy not to join PET—there's truly no better way to prepare for success in the field."*

"Alex is excelling in class. I can already see a bright future for him in the industry." Mr. Harding said.

One of Alex's favorite aspects of the program has been operating diesel motors. "They're incredibly loud and shake the entire school. It's amazing to see something as large as a small car in action—it's really impressive." After graduation, Alex intends to jump right into the workforce and advance in the heavy machinery industry.

"Mr. Harding is an amazing instructor," Alex added. "He can answer any question, but before he gives you the answer, he walks you through the reasoning behind it and really connects with you."

Outside of academics, Alex plays football for Cuyahoga Heights High School and considers himself a "tinkerer," always working on fixing things. *"You can sum me up in two words—football and motors."* His advice to anyone considering CVCC? *"You'll learn a ton, fast. Leaving CVCC, you're truly set up for success."* Keep up the fantastic work, Alex!
