Jeremiah Wiggins

Nordonia Hills

Jeremiah Wiggins, a junior at Nordonia Hills High School, is a dedicated student in the Digital Design program at CVCC, where he learns under the mentorship of Melissa Munro. He chose this program to pursue his deep-rooted passion for drawing and design.

Jeremiah's future aspirations include becoming an automotive designer, with a focus on F1 aerodynamic innovation. He hopes to work with prestigious brands like Corvette or GM, contributing to the creation of cutting-edge vehicles. Jeremiah also dreams of traveling the world through his career, participating in iconic events like the 24 Hours of Le Mans, a renowned race held at the Circuit de la Sarthe in France.

At CVCC, Jeremiah's most memorable experience has been his involvement in SkillsUSA, where he was recently elected as a Regional Officer and serves as his class President. In the classroom, one of his favorite activities has been improving his technical design skills by drawing detailed perspectives of the school's hallways—an exercise that resonated with his passion for precision and creativity.

Jeremiah appreciates how CVCC has shaped him, noting that it has "kept him on his toes" by challenging him in positive ways. The program has enhanced his social skills and taught him valuable lessons in organization as he balances the workload of attending both his high school and CVCC.

Beyond academics, Jeremiah stays active by participating in soccer and track at Nordonia High School. He also works part-time at Culver's and enjoys playing video games in his free time. Additionally, he values his time spent strengthening his faith and relationship with God.

Jeremiah's advice to prospective CVCC students is clear: "Go for it—but only if you're committed. The experience is incredibly rewarding, but it takes hard work and dedication. You have to fully invest yourself to truly benefit from it." Great job, Jeremiah—keep striving for success!
